## Analogue Suitcase Repeater

This Portable Suitcase Repeater is ideal for emergency and temporary use.

The suitcase is fitted with SRM9000 Radios, which can be incorporated with different option boards to enable a wide variety of configurations.

The repeater can offer the following features:

- Trunking (TMR) to Conventional (PMR) VHF or UHF
- VHF to VHF, UHF to UHF or VHF to UHF
- Single or Multi Channel with up to 25W power output
- 7 frequency bands covered (66-520MHz)
- AC/DC Power with optional Battery Back Up
- Unbreakable water- and airtight Pelican® suitcases are available in a range of colours and sizes
- GPS Option

Example of a VHF to UHF Repeater together with SRP9130 Portable Radios:

- The Control Unit controls each radio independently
- Both VHF and UHF radios are able to receive at any time since the user transmits only on the radio currently selected by the control unit
- Repeater-Mode can be remotely activated and deactivated via a selcall
- The repeater has a "clone" time (after switch-on) during which, a portable radio can register its selcall ID for controlling the repeater
- Portables are able to:
  - Toggle Repeater-Mode On and Off via a selcall
  - Send a duress selcall (repeated by the repeater) to base-control
  - Have voice comms with repeater (when not in repeater-mode)
  - Have voice comms with base-control (when in repeater-mode)
